Hi Agnes:

Do you have a copy of Visual FoxPro? If so, then try using the VFP Upsizing Wizard to convert the tables into SQL Server.

If you are running VFP 7.0, you may want to get the updated Upsizing Wizard from this web site:

<http://msdn.microsoft.com/vfoxpro/downloads/updates/default.aspx>

I hope this helps.

This posting is provided "AS IS" with no warranties, and confers no rights.

Sincerely,
Microsoft FoxPro Technical Support
Lee Mitchell

-- VFP8 HAS ARRIVED!! --

Read about all the new features of VFP8 here:

<http://www.universalthread.com/VisualFoxPro/News/VFP8Release.asp>

Purchase VFP8 here:

<http://shop.microsoft.com/Referral/Productinfo.asp?siteID=11518>

Keep an eye on the product lifecycle for Visual FoxPro here:
