Hello and thanks in advance for the help....

Does anyone know why MouseLeave doesn't always fire?

Here is what I did...

I created a form to which I added a container.

In the MouseEnter Method I coded:  
`this.BackColor = 8454016 && Green`

In the MouseLeave Method I coded:  
`this.BackColor = 255 && Red`

Then I ran the form.

If you move the mouse slowly, it does exactly what you would expect. It turns green when you enter and red when you leave.

But if you move the mouse quickly you can get it to miss the MouseLeave event.

Does anyone know if there is anything that can be done about this (short of tell my users to move the mouse slowly)?

Thanks,  
Jeff
