Alltrim " " equals the empty string which in the logic of SQL is equal to any value.

Thanks, Anders. This is something that I did not know before you and Bernhard explained it. It makes me laugh to think about a little book I bought several years ago: "Teach yourself SQL in 24 hours."

Six hours for S, six hours for Q, six hours for L, and six hours for anything else that comes up. <BEG>

Sincerely,

Gene Wirchenko
