- 

You can add / remove components (all) to your original install

| Can I re-install frontpage over the first installation or should I first  
| un-install it? I am upset with myself for chosing the typical install option  
| (which will install only the most common components for frontpage. Meaning  
| if I need to use a component that is not included in the typical installation  
| I'm up the creek without a paddle. So can I re-install frontpage over the  
| first installation and this time chose complete or do I first need to  
| un-install it

| Thank you  
|  
|
