Greg:

Wrap the DatabaseResultColumn display area in a bit of script, like this:

```
<% If fp_rs("Municipality") > " " then %>
```

```
  <li><b>Municipality:</b>&nbsp;&nbsp;<!--webbot bot="DatabaseResultColumn"
startspan
```

```
s-columnnames="ProgramArea,RecordNum,Date,ItemNumber,SplitItem,Session,PA_SA
,ActNumber,Section,Recipient,Municipality,FundsUse,DollarField1,DollarField2
,DollarField3,DollarField4,Any_Previous,DollarField5,FundNum,AgencyNum,SID,P
roject_Num,Description"
```

```
  s-column="Municipality" b-tableformat="FALSE" b-hashtml="FALSE"
clientside
```

```
  preview="&lt;font
size=&quot;-1&quot;&gt;&amp;lt;&amp;lt;&lt;/font&gt;Municipality&lt;font
size=&quot;-1&quot;&gt;&amp;gt;&gt;&lt;/font&gt;" b-makelink
b-MenuFormat --><%=FP_FieldVal(fp_rs,"Municipality")%><!--webbot
  bot="DatabaseResultColumn" i-Checksum="33247" endsan --></li>
```

```
<% End If %>
```
