1-got it.

2-got it.

3-don't got it. - are you saying that if I use CPanel I *can* do what I want in the org. post?

| Using FP, you can only protect subwebs (all content within), not individual folders or files.

|

| Using a script, you can only protect files, not folders or document/images.

|

| Using the server OS, you can protect all folders and files.

| Is this possible:

|

| <http://www.regularweb.com/unprotectedsubweb/protectedpage.htm>

|

| Linux/Apache

|

| or do permissions only start at the root, and pass down to children?

|

| tnx,

|

| Rob
