When i try to post my website, i get the following
message:

Accessing HTTP service requires 32-bit TCP/IP networking,
which is not installed or may be misconfigured. Would you
like to see help on how to install it?

Click here to use the Network option in the control
panel. Choose the Add Software button in the Network
Settings dialog box and follow the instructions on screen
or see the installation Guide.

when i opened control panel i could only find Local Area
Network (i'm connected through a cable modem). I have
Win Xp, can some one please help me
Thank you
