Specifically, Link Bars. An error box comes up with all my link bars.htm's saying your server does not support these features. To enable link bars, publish your site to a server running the latest version of Frontpage extensions.

I called my host and they said to call microsoft to see what extensions are needed for me to publish my site. Their highest power ext's are 3.02. I just picked up FP 2003 a week ago.

Thanks
