Hi Stefan!

You're absolutely right!! I haven't checked it yet but what your saying makes a lot of sense so I'm betting that will fix it! As I said before, I'm just a photographer with some spare time in my hands and I love to make web sites, so I don't know how to code scripts in any language, but I feel that sometimes I can get some sense of the codes and, before this one, I had been able to find the problems for myself. But this time I just couldn't do it alone, so I thank you all of you guys who took the time to help me. I really really appreciate it a lot.

I'm on my way to check the code and do the proper modifications and see how it goes.

I sincerely send you my best regards,

Eduardo Marquez-Blake
