```
It looks like Opera is passing if(document.all) so I'd change this line
if (document.all) {
document.images.SlideShow.style.filter="blendTrans(duration=2)";
to
if (document.all && !window.opera) {
document.images.SlideShow.style.filter="blendTrans(duration=2)";
and then
if (document.all) {
document.images.SlideShow.filters.blendTrans.Play();
}
to
if (document.all && !window.opera) {
document.images.SlideShow.filters.blendTrans.Play();
}
```

This should stop Opera trying to run the filters, then the slideshow should work as it does in Netscape.
