All I have is Acrobat 6 so I really don't know if this is an enhancement

If I make a PDF file from a form with drop-down's, text fields, Radio buttons, and Check boxes it gets them all... AND they work just as if it were a web page. (Links work too)

Now where the problem comes is you can not save the filled in form (using just the reader)... But you can E-Mail it or Print it (If the permissions are set right on the master PDF.)

I got it for one site (real-estate listings) so that when someone downloaded the file it was exactly the way (format wise) it was laid out. That company might not know it but it was in their bill for the software..... (under other tools needed?)

| Don,

| Is that just Acrobat 6? I've been fiddling with my copy of CS and  
noticed

| there were some "enhancements" to Acrobat, with that being one of them.

I'm

| unsure if it's just a "tweak" to an preexisting capability or a new  
| capability for 6.

| TIA
