Yes, but you need a table (or query) to get the list of options for the dropdown

| I'm using FP2002, and have created a Database Editor to modify existing
| records in an access db. The edit page of the editor uses all free-form text
| fields for modifying existing data, even if it was submitted via drop down
| box forms.
| Is there a way to use drop down boxes in the db editor as you would in a
| standard form to modify data?
