Hi James,

Do you have the Service Packs installed? FP2K was shipped with this problem and was later corrected by Service Pack.

There are some bugs in FP2002 & the FP2002 SE
Make sure you (and your host) see & apply patches from:

For Unix server problems on the FP2002 SE see
<http://support.microsoft.com/default.aspx?scid=kb:en-us:Q299360>

For NT server problems on the FP2002 SE see
<http://support.microsoft.com/default.aspx?scid=kb:en-us:Q298827>

For FrontPage Server Extension 2002 Update – see
<http://support.microsoft.com/default.aspx?scid=kb:EN-US:q317296>

For info in Service Pack 1 for FP2002 / MSO XP – see:
<http://support.microsoft.com/default.aspx?scid=kb:en-us:Q307843>

Even after applying all of above, some users still experience the problem, in which case having the host roll back to the FP2000 SE is the only fix
