Stefan, I downloaded the 57MB SP3 but couldn't apply. I got a dialog box saying that it has already been applied and it cannot be reapplied. Help->About says that it is FP 2002 with SP3! Still crashes in the same place.

Any ideas how to get out of this situation? Can I get a 30-day trial version of FP 2002 (with SP3 bits applied)? Looks like this is the end :( Can you suggest any alternative to FP?

Thanks in advance.
