FP 2003, WinXP Pro

For some strange reason, I can't seem to make a table a fixed size. What am I doing wrong. There's an amount in the "width" and "height", however, it publishes with a totally different width and the width changes when I resize the IE windows. I know that this isn't what's always wanted, but for some of what I have ... I want a fixed width.

Please help. Thanks.

Diana
