Robert:

This page will tell you what requires the FP server extensions:
<http://support.microsoft.com/default.aspx?scid=kb:en-us:281532>

If you don't use any of the features, you can do a simple web and ftp it to the remote server.

| I sometimes hear from an ISP that it won't accept "FrontPage Extensions".

|

| What if I just want to create a simple web page with a few static graphic
| images (JPG image)? Can I do this in FrontPage and upload the page to the
| server that doesn't accept "FrontPage Extensions"?

|

| In other words, does FrontPage Extensions mean fancy things like
| animation,
| etc.?

|

| I basically want as simple a program as possible to design the web page,
| manage its uploading/updating, etc. I don't want to have to learn
| Dreamweaver if I don't have to.

|

| Thanks

|
