Suggest you post to the Windows Server newsgroup, as my solution would be to re-install IIS and the FP extensions, then I would have published each web to it new location or I would have used a application such as Migrate Easy to copy one drive to another.

If you feel your current issue is a results of installing a Service Pack or security update, please contact Microsoft Product Support Services:

<http://support.microsoft.com>

If the problem can be shown to have been caused by a security update, then there is usually no charge for the call.
