With your FP web open, File | Import the documents into a folder in your web, and create a link on a page to the file.

BTW, this question is asked and answered daily in the FP newsgroups. Try reading some posts now and again. Be surprised what you might pick up. ;-)

| Hi,

| I want my customers to download document files from my website.

| How do I do that in FP2002. Any help will be appreciated. Thanks!
