Why are you trying to install Office 2003 updates to FP 2002?  
– unless you are also running other Office 2003 programs  
The update is not applicable to FP 2002 and your publishing problem

Publishing problems are usually not related to your client software so reinstalling FP 2002 on your PC does not solve the problem

It is usually a server related problem

Try opening your online site in FP and Running a Tools Recalculate Hyperlinks  
Then clean out the FP cached files that may be corrupt

- 1) In Windows Explorer Find and delete all FP Temp Files  
Usually in C:\WINDOWS\Temp and %USERPROFILE%\Local Settings\Temp
- 2) In Windows Explorer Find and delete all hidden \*.web files  
Usually in %USERPROFILE%\Application Data\Microsoft\Web Server Extensions\Cache

Try to publish All and if you get another error ask your host for the server log events related to the error

| I have been having problems uploading my website.

|

| I have reinstalled frontpage2002 and tried to get the updates but it does  
| not allow me to install Office SP3

|

| I have tried to change the registry entries as shown on the Microsoft site  
| but these do not exist.

| <http://support.microsoft.com/?id=884298>

|

| I have installed the software afresh and tried to upload my website but it

Re: frontpage2002 not able to do office SP3

| does not complete. the upload stays up but does not finish the last file.

| the file it tries is not an issue, I can upload them one at a time by right  
| clicking them and publish the selected files.

| but using the publish button causes FrontPage to stop uploading files. and  
| times out after ages.

| I have tried to reinstall it and removed it completely and then installed it  
| fresh but still I can not upload.

| can anyone suggest something that can fix this.

| thank you in advance.

|
