You can't mess with the submit button in a form, either by adding a hyperlink or a click event as either one will break it.

You'll need to find another method.

I'm using FP2003 to create a simple form.
I planted a JS function ("on click") so once form submitted it will go to a confirmation page depending on the original page that directed me to the form

The function works but when associated with the FP form the form won't send the msg. To my email

Any suggestions?

Shai w.

Here is the code:

```
<body>

<script type="text/javascript">
var A = document.referrer
function checkReferrer()
{
```

Re: JS & fronpage form

if (A == "http://www.mysite.com/page1.htm)

{
window.location="http://www.mysite.com/thankyou-page1.htm
}

else if (A == "http://www.mysite.com/page2.htm)

{
window.location="http://www.mysite.com/thankyou-page2.htm
}
}
</script>

<form method="POST" action="--WEBBOT-SELF--">
<!--webbot bot="SaveResults" S-Label-Fields="TRUE"
B-Reverse-Chronology="FALSE" S-BuiltIn-Fields startspan
S-Email-Address="email@xxxxxxxxxx" S-Email-Format="TEXT/PRE"
B-Email-Label-Fields="TRUE" --><input TYPE="hidden" NAME="VTI-GROUP"
VALUE="0"><!--webbot bot="SaveResults" endspan i-checksum="43374" -->
<p><input type="text" name="T1" size="20"></p>
<p><input type="submit" value="Submit" name="B1"
onclick="checkReferrer()"><input type="reset" value="Reset" name="B2"></p>
</form>

</body>
