

Re: buttons not saving roll over effects

Source:

<http://www.tech-archive.net/Archive/FrontPage/microsoft.public.frontpage.programming/2008-05/msg00010.html>

- *From:* "Charlotte" <charlotte@xxxxxxxxxxxxxxxx>
 - *Date:* Thu, 1 May 2008 23:11:15 +0300
-

ive tried the below, still only saves the one state,
when ive looked at the script error the button overlays were being linked to
:

```
</p>
```

basically – file:///C:/Documents and Settings/charlotte's/Local
Settings/Temporary Internet Files/FrontPageTempDir/button1C.jpg"

but ive noticed in my local settings folder there is a folder called Temp
not Temporary Internet Files... there is then the FrontPageTempDir folder –
but its empty...

so now what?

"Ronx" <ronx917@xxxxxxxxxxxx> wrote in message
news:OIKcEv2qIHA.4912@xxxxxxxxxxxxxxxxxxxxxxxxxxxx

The apostrophe in Charlotte's will cause problems in webs contained in the
Charlotte's profile – particularly when testing JavaScript. To avoid
these problems us a folder outside the Documents and Settings folder – for
example create a new website at C:/mywebs/mywebsite

Re: buttons not saving roll over effects

Whether this affects the creation of the Interactive Buttons I do not know, but it will affect testing them.

news:#Z4Hn50qIHA.5068@xxxxxxxxxxxxxxxxxxxxxxxx:

Thank you for the below– i tried it all (and yes i meant un–installed frontpage :o), still only 1 button of 3 would save.
Do you think its the way my computer has been re–set up?
As i have noticed that i have 2 links/folders going to My Documents – a direct folder to My Documents, and then in My Computer, Local Disk C:/ i have the two folders – My Documents, and Documents and Settings. In Documents and Settings – there are 3 folders All Users, charlotte's, and Default User. In the charlotte's folder is many folders including another My Documents...

Should i take my computer back to computer man and get him to re–install windows?

when i did do all the below – a folder was made with a globe on it – so that seemed to be one right thing ..
Ps. charlotte's web – you made me laugh ;o))

You can create a web folder anywhere you want.

When you say you 'deleted' Frontpage, I hope you meant UNinstalled it?

Re: buttons not saving roll over effects

Try this again;
Open FP
File | New then over on the right side of your screen select
under New
Web
Site one of the Templates for a web site ... maybe Personal
Web Site,
whatever...doesn't matter.

Now pay attention here on the right side of THAT window it
says
Options;
Specify the location of the new Web site;
In that drop down window enter THIS: C:\My
Documents\My Experimental
Webs\charlotte
(this will create the web folder My Experimental Web with a
web named
charlotte inside of it.

Now with this web site created and opened try creating your
IB buttons.

Save and close the web.

Let's try opening it properly;
Open FP
File | Open Site
browse to My Documents | My Experimental
Webs....charlotte

(HA...Charlotte's Web !! – funny)

Now when you are Done and want to delete chalotte web
Open FP
File | Open Site
open this web as above
with the site opened, select the root (the top most file in the
File
List
on the left side of the screen) and select delete...you'll be
prompted
to
delete all or something else I forget...but Delete it all.

This procedure is slightly different if you are working with a
server
on
your local machine and not a disc-based web.

for server you'd substitute <http://localhost/charlotte> instead

Re: buttons not saving roll over effects

of the
C:\ path given above.

ALWAYS OPEN A WEB SITE BEFORE MAKING
CHANGES TO YOUR WEB PAGES.

hth...

ive deleted the whole of frontpage and  
re-loaded it again, but it  
hasnt  
created a My websites folder.. so when i go  
to make a new one page  
website – i have to select the location i want  
to save the site in...  
what to do?  
done another test page and still will only  
save 1 button..

You do Not have a FP web  
site Open  
Or you are opening the page  
in the web and saving it  
outside of your  
FP  
web site

Re: buttons not saving roll over effects

The IB will never show until  
you open a FP Web site  
First and Then  
open  
a new page in that web site

The path for the save IB  
buttons is showing as:  
file:/C:/Documents%20and%20Settings/charlotte%27s/Local%20Settings/Ter
