Also,

in another menu I have the following script:

```
<script type="text/javascript">

/*****
* AnyLink Vertical Menu- © Dynamic Drive (www.dynamicdrive.com)
* This notice MUST stay intact for legal use
* Visit http://www.dynamicdrive.com/ for full source code
*****/

//Contents for menu 1
var menu1=new Array()
menu1[0]='<a href="http://www.javascriptkit.com>JavaScript Kit</a>'
menu1[1]='<a href="http://www.freewarejava.com>Freewarejava.com</a>'
menu1[2]='<a href="http://codingforums.com>Coding Forums</a>'
menu1[3]='<a href="http://www.cssdrive.com>CSS Drive</a>'
menu1[4]='<a href="http://tools.dynamicdrive.com/
imageoptimizer/">Image Optimizer</a>'

//Contents for menu 2
var menu2=new Array()
menu2[0]='<a href="Q:\intranet new\Audit\BSA\BSA.htm"
target=" blank"style="color: #000000">BSA</a>'
menu2[1]='<a href="Q:\intranet new\Audit\Statutory\Statutory.htm"
style="color: #000000">Statutory</a>'
menu2[2]='<a href="Q:\intranet new\Audit\Trust Accounts\Trust
Accounts.htm" style="color: #000000">Trust Accounts</a>'
```

I get an error message saying that 'Cannot find 'file:///Q:\intranet %20newaudit%08sa.htm' whenever I try and click on the BSA link – is there a problem with linking to an internally housed htm page?

I'm am not very experienced in working with code – but I'm pretty good

Re: Creating Java/DHTML Vertical Navigation Menu in FrontPage
at learning computer-related stuff so hopefully I'll get there!!!
