| Does anyone know anything i can do to maybe fix this?:

| It says ! ~f1d055.tmp – Corrupt File

| The file or directory C: is corrupt and unreadable. Please run
| the Chkdsk utility.

|

| I've tried the Chkdsk,

| I've tried uninstalling and reinstalling,

| I've tried deleting all spyware,

| I've tried a virus scan showing no viruses,

| and I have no clue what to do.....

Hi Displunker,

That type of error could mean the CD is corrupt... Check the CD and the CD Player. Clean both using a Cleaning Kit, and check for scratches on the CD. Try installing the game on another computer, if the game installs, the culprit is probably your CD ROM drive if it doesn't install then it's the CD, in which case you need to replace it.

Before replacing the CD, try copying it to your hard drive and then run the setup / installation program from there. To copy the CD go to My Computer, Right-Click the CD, Choose "Copy", then Right-Click on your Hard Drive, Choose "Paste".

Uninstall the game using Add-Remove programs before attempting to reinstall it. (Start / Control Panel / Add-Remove Programs).

Here are three basic troubleshooting steps which I recommend:
(You've already tried a couple of these, however be sure to go to Start / Run / type: %temp% and then delete as many of those files there as you can by sending them to the Recycle Bin)

1. To see if it's a software conflict: Temporarily disable Startup programs one at a time, starting with Firewall, Antivirus, and ad blockers using: <http://new.jtsoft2001.com/windows/startup.php>

Re: corrupt file

You can lookup what a program does before you disable it here:
<http://www.sysinfo.org/startuplist.php>

2. Run a virus scan at: <http://housecall.antivirus.com> Afterwards
Download & Run Spybot from: <http://security.kolla.de> and/or
Adaware (www.lavasoftusa.com) to remove any Spyware/Adware.

3. Click My Computer / Rightclick the Drive & Choose Properties
/ Run the "Disk Cleanup..." / Next Click the "Tools" Tab and run
the "Error-Checking" and "Defra
