Hi Kael,

Sorry to hear about the scratched CD's, you should get them replaced..

Call the MS Product Replacement Centre: Mon – Fri 8am –10pm ET
in the US at: 1-(800)-360-7561, or in Canada at: 1-(800) 933-4750
For more info please visit: <http://support.microsoft.com/?kbid=326246>

| The CD's were scratched very badly and we couldnt repair them (my fault in
| the first place). A friend and I (after several hours of trying and
| retrying), managed to get the files off of the CD's. We could not install
| directly from the CD's because of the damage, so we had to copy them.

| Hi Kael,

||
|| What type of issue were you having when you tried to install from the CD's?
|| Are the CD's defective? Can you install from those game on another system?

|| =====

|| Alright, I was having issues running the cd's, so I moved them all onto my
|| computer and ended up with 4 Folders, 1 for each CD.

||

|| The first folder had an autorun.exe so I accessed and it began installation,
|| entered my serial and began. At several points, it said "unable to find file
|| blahblah", i found the files inside of the other folders (disks 2,3,4) and
|| moved them into Folder 1, and retried the check for the file. It accepted and
|| continued to install.

||

|| The game finished installing and so i ran the available file, Fable.exe. The
|| splash screen popped up, then closed and I received an error message saying
|| "ERROR: Could not find Library".

||

|| I am unable to find out what exactly the library is or why the executable
|| cannot find it. Please help me.

.
