\*\*\*\*\*

SESSION\_HAS\_VALID\_POOL\_ON\_EXIT (ab)

Caused by a session driver not freeing its pool allocations prior to a session unload. This indicates a bug in win32k.sys, atmfd.dll, rdpdd.dll or a video driver.

Arguments:

Arg1: 00000014, session ID

Arg2: 00008568, number of paged pool bytes that are leaking

Arg3: 00000000, number of nonpaged pool bytes that are leaking

Arg4: 0000058f, total number of paged and nonpaged allocations that are leaking.

nonpaged allocations are in the upper half of this word,

paged allocations are in the lower half of this word.

Debugging Details:
