Hallo,

nachdem ich mich vor einer Weile schon einmal mit der Installation der SQL Server Express Edition herumgeplagt habe, hab ich nicht nun an die Installation der CTP Edition gewagt. Fataler Fehler :-(. Es scheitert immer wieder an der gleichen Stelle und auch Google bietet keine Antworten zu diesem Problem.

So sieht es in der Summary.txt aus:

```
Product : SQL Server Database Services
Error : SQL Server Setup could not connect to the database service
for server configuration. The error was: [Microsoft][SQL Native Client]TCP
Provider: No connection could be made because the target machine actively
refused it.
Refer to server error logs and setup logs for more information. For details
on how to view setup logs, see "How to View Setup Log Files" in SQL Server
Books Online.
```

Im etwas detaillierteren Logfile sieht's so aus:

```
Connecting to SQL Server
ExecuteSqlCommands
Original error was 8007274d (10061)
ipt
SqlScriptHlpr
```

```
Error Code: 10061
MSI (s) (54!EC) [22:57:28:953]: Product: Microsoft SQL Server 2005 CTP --
Error 29545. SQL Server Setup could not connect to the database service for
server configuration. The error was: [Microsoft][SQL Native Client]TCP
Provider: No connection could be made because the target machine actively
refused it.
Refer to server error logs and setup logs for more information. For details
on how to view setup logs, see "How to View Setup Log Files" in SQL Server
```

SQL Server 2005 CTP Installation

Books Online.

Error 29545. SQL Server Setup could not connect to the database service for server configuration. The error was: [Microsoft][SQL Native Client]TCP Provider: No connection could be made because the target machine actively refused it.

Refer to server error logs and setup logs for more information. For details on how to view setup logs, see "How to View Setup Log Files" in SQL Server Books Online.

<Func Name='GetCAContext'>

<EndFunc Name='GetCAContext' Return='T' GetLastError='203'>

Doing Action: Do_sqlScript

PerfTime Start: Do_sqlScript : Mon Aug 29 22:57:28 2005

Service MSSQLSERVER with parameters '-m -Q -qSQL_Latin1_General_CP1_CI_AS -T4022 -T3659 -T3610 -T4010' is being started at Mon Aug 29 22:57:28 2005

Attempt to start service when it is already running

SQL service MSSQLSERVER started successfully waiting for SQL service to accept client connections

Service MSSQLSERVER started at Mon Aug 29 22:57:28 2005

Loaded DLL:

C:\WINNT\system32\Odbc32.dll

Version:

3.525.1022.0

Die Installation ist lokal erfolgt, da hat an keiner Stelle ein anderer Rechner mitgespielt. Wozu also überhaupt ein TCP Provider?
Wenn es schonmal jemand geschafft hat die CTP Edition zu installieren und evtl. zwischendurch auch mal diesen Fehler hatte, wäre ich für jeden heißen Tipp dankbar.

—

MfG,

Daniel Kuppitz
