You need to create the following protocol definitons
(under Policy Elements):

1. Yahoo! Voice #1

TCP

Port 5001

Outbound

2. Yahoo! Voice #2

TCP

Port 5000

Outbound

3. Yahoo! Voice UDP

UDP

Port 5000

Receive Send

4. Yahoo! WebCam 1

TCP

Port 5100

Outbound

5. Yahoo Messenger Chat

TCP

Port 5050

Outbound

6. Yahoo Voice UDP 2

UDP

Port 5000

Send Receive

7. Yahoo Webcam 2

UDP

Port 5050

Receive

8. Yahoo Webcam 3
UDP
Port 5050
Send

9. Yahoo Voice UDP 3
UDP
Port 5001
Send Receive

10. Yahoo Voice UDP 4
UDP
Port 5001
Send

11. Yahoo Voice UDP 5
UDP
Port 5001
Receive

12. Yahoo Voice UDP 6
UDP
Port 5001
Receive Send

After you create these you need to add a protocol rule for them in Access Policy. It should work. Dont forget to install Firewall client in your workstation and connect Yahoo Messenger with NO PROXY. Uncheck from autoupdate option.
