I have to publish SQL Server so I can access it from Internet.

I did exactly as is say on Microsoft webpage but still no luck.

When I try to connect to my SQL Server by giving my Isa Server IP address I get the error that the SQL Server does not exist or I don't have permission.

I use on *.UDL file to test this.

```
Provider=SQLOLEDB.1;Password=nukedi;Persist Security Info=True;User ID=sa;Data Source=192.168.10.2,1433
```

When I change the connection string to

```
Provider=SQLOLEDB.1;Password=nukedi;Persist Security Info=True;User ID=sa;Data Source=192.168.10.1,1433
```

I work's fine.

Any ideas
