Solved the problem – mine was more related to Kerberos setup.

Thanks
Mark

Are there any documents for setting up MOSS 2007 with ISA 2006? I thought I had done everything right, but I am getting a 404 error after authenticating. I am trying to use certificate based authentication with Kerberos, but have also tried HTML forms. I enter the credentials and get a Failed Connection Attempt in the ISA monitoring.

Any info would be appreciated,
Mark
