Hi,

i try to publish my Reporting Service with https, to use them with Microsoft CRM 3.0.

It is working for short urls but not for long ones! If the url is longer than 400 chars, i get the error 401 not authorized. The Authentication Form isn't also shown up. I raised the Values in the HTTP Filter, but nothing changed!

So does anybody know why it isn't working?

Regards, Biba
