I am trying to configure the quarentena in an ISA 2006 ST and he/she gives me the error:

```
C:\scripts > Cscript ConfigureRQSForISA.vbs / install AllowedSet
```

```
Microsoft Windows (R) Script Host version 5.6  
Copyright (C) Microsoft Corporation 1996-2001. Reserved all the rights.
```

```
Looking for ISA installation path...  
Configuring RQS service to start automatically...  
[SC] CORRECT ChangeServiceConfig
```

```
Adding the allowed version strings under  
HKLM\System\CurrentControlSet\Services\Rqs...  
Setting RQS Authenticator valued under  
HKLM\System\CurrentControlSet\Services\Rqs...  
Updating firewall policy...  
Adding RQS protocol definition...  
Creating RQS access rule:  
- from Quarantined VPN clients and VPN Clients  
- to local host  
- protocol = RQS  
C:\RS\ConfigureRQSForISA.vbs (290, 9) (null): The element Net to which makes  
reference Rules of directive Remote Access Quarantine (RQS) it doesn't  
exist.
```

```
Error in the object "Remote Access Quarantine (RQS)" of the class "Rules of  
directive" in the environment of main "VPNSERVER."
```
