Hi Matt,

Thank you for posting back.

I understand that the "authenticated users" is also working now. I think this should be the IE/ISA cache that works.

If the problem occurs again, please use the "all users" method to solve it.

I will check the other post later that you sent an e-mail to me today.

Regards,

Bill Peng

Microsoft CSS Online Newsgroup Support

Get Secure! – www.microsoft.com/security

=====
The public newsgroup only focuses on SBS related technical issues, for other Microsoft products, we recommend you to post to appropriate newsgroup to get most qualified responses.

<http://www.microsoft.com/communities/newsgroups/en-us/default.aspx>

When opening a new thread via the web interface, we recommend you check the "Notify me of replies" box to receive notification. When responding to posts via your newsreader, please "Reply to Group" so that others may learn and benefit from your issue.

Microsoft engineers can only focus on one issue per thread. Although we provide other information for your reference, we recommend you post different incidents in different threads to keep the thread clean. In doing so, it will ensure your issues are resolved in a timely manner.

For urgent issues, you may want to contact Microsoft PSS directly. Please check <http://support.microsoft.com> for regional support phone numbers.

Any input or comments in this thread are highly appreciated.
