hi

it didnt work by posting it directly to IE, plus when i ping 127.0.0.1 i dont get a replay, just a timed out message, is there any thing i should enable ?

Notice the URL address of 127.0.0.1

That is not on the Internet,...and you don't use ISA to get there.

The problem is that it is using the IP# in the URL instead of "localhost" and IE does *not* handle IP#s in the URL properly. If you manually entered this in the IE Address Bar it would probably work

hi

i have installed rational uml modeling on my pc but it cant connect to the internet for help files and update, my OS is Vista Ultimate, we have ISA Firewall 2004 on Windows 2003 Enterprise, im the admin so i made a rule for my self to allow every thing all types of traffic so why this software is blocked ?

i defined the firwall on the software but still no access, i attached a monetoring record you can see some information about it, thank you
