I have a problem with a ISA server that the firewall service stops with the following message in the event viewer. It become to be a very big problem because when the service stop nobody can't use the internet. I have a fear that is anyone that provoke this to access to my computers from the internet. Please send me an answer to help me to resolve this question.

Tipo de evento: Erro

Origem do evento: Microsoft Firewall

Categoria do evento: Nenhum

ID do evento: 14057

Data: 12-02-2004

Hora: 9:44:56

Utilizador: N/D

Computador: ISA2000

Descrição:

The Firewall service stopped because an application filter module C:\WINNT\system32\ntdll.dll generated an exception code C0000005 in address 784ACA36 when function CompleteAsyncIO was called. To resolve this error, remove recently installed application filters and restart the service.

Computador: ISA2000

Descrição:

Due to an unexpected error, the service fwsrv stopped responding to all requests. This occurred 1 time(s) in the past 1:04 hours. Try to stop the service or kill the corresponding process if it does not respond, and start it

microsoft.public.isaserver: Firewall service stops

again. Check the Event Viewer for related error messages.

I have the windows 2000 SBS + ISA 2000 Server
