I have problem to browse with Amazon site. The url (as below) is with the numbering (which generate randomly) at the end. Do you have any idea why they include the numbers at their url?

<http://www.amazon.com/exec/obidos/subst/home/home.html/002-0179895-0147220>

<http://www.amazon.ca/exec/obidos/tg/browse/-/915398/702-4290953-4591237>

<http://www.amazon.com/exec/obidos/subst/home/home.html/103-3423729-5805425>

<http://www.amazon.co.uk/exec/obidos/tg/browse/-/468294/203-7010224-9098352>

If browse through ISA, that page failed to displayed.

If without ISA, that page can display. Do you have any ideas how to solve it?

Thanks
