I'm using Igor's toolkit, and as i need to know which IE window does each request i have:

```
PROTOCOLDATA protdata;  
protdata.grfFlags = PD_FORCE_SWITCH;  
Switch(&protdata);
```

```
CComPtr<IWindowForBindingUI> spWindowForBinding;  
QueryServiceFromClient(&spWindowForBinding);
```

which works just fine for any request, except for videos, like going to youtube and watching a video. Any ideas how to get over this ?

.

PassthruAPP: QueryServiceFromClient(&spWindowForBinding); returns null for Media player request ?
