I offer web space for our client to host their website. We offer them to upload asp files.

How can we prevent our client to upload asp files which are delete or change files in our server.

For example, using the Scripting.FileSystemObject to delete our system file.

Set objFSO =

CreateObject("Scripting.FileSystemObject")objFSO.DeleteFile("C:\FSO\ScriptLog.txt")

Please help and advise.

Regards,
Chris
