I am getting the following error in my code "Too few parameters. Expected 1." I am getting it on the following line

```
set rs = conn.Execute(SQLStatement)
```

When I put in response.write (SQLstatement) I get
SELECT * FROM QPR WHERE Status= Closed
If I change it to set rs = conn.Execute("SELECT * FROM QPR")
it will work.
I need ot be able to use the where clause. This is how I am setting
SQLstatement.
SQLStatement = "SELECT * FROM QPR WHERE Status= " &
Request.QueryString("Status")

Thanks
Bob
