all the registry keys are set to ThreadingModel = Apartment

> 2. *They don't want you doing this change in W2003*

> 3. *You can't make this change in W2003*

well. "never change a running system". so i'm resisting in playing around for the moment and...

>> *not at all. i'll prepare some new tests. i always thought it*

>> *Server.CreateObject was recommended over CreateObject*

>

> *As did I. I recently had it pointed out to me that things had changed.*

... rather change my code for the better :-)

thanks,

thomas
