But i have wrote that manually the delete command it's OK!!!

My problem is in the scheduled phase, when nobody is logged on the server

"Bernard Cheah [MVP]" <qbernard@xxxxxxxxxxxxxxxxxxxx> ha scritto nel messaggio news:OWjS30ipGHA.4760@xxxxxxxxxxxxxxxxxxxxxxxx

Ok, you are create the scripts file dynamically.
Can you manually run the script file?
ftp -s:ftpscript.txt

post the output here or you can redirect the output to > abc.txt.

Here's my code scheduled every day

Option Explicit

```
Dim objFSO, objMyFile, objShell,FileLog
Dim anno, mese,meseN, giorno,Return
Dim d1,strFTPScriptFileName, strFile2Get
Dim strLocalFolderName, strFTPServerName, strLoginID
Dim strPassword, strFTPServerFolder
```

```
d1=dateadd("d",-1,date)
```

Re: FTP delete problem

```
anno=Right(year(d1),2)
mese=Trim(month(d1))
if len(mese)<=1 Then
mese="0"&mese
end If
giorno=day(d1)
if len(giorno)<=1 Then
giorno="0"&giorno
end If
```

```
FileLog = Trim("ex"&anno&mese&giorno&".log")
```

```
strLocalFolderName = "d:\logfiles"
strFTPServerName = "10.10.20.50"
strLoginID = "mylogin"
strPassword = "mypassword"
strFTPServerFolder = "W3SVC1095794977"
```

```
Set objFSO = CreateObject("Scripting.FileSystemObject")
```

```
strFTPScriptFileName = "C:\Inetpub\wwwroot\stat\FTPScript.txt"
```

```
Set objMyFile = objFSO.CreateTextFile(strFTPScriptFileName, True)
objMyFile.WriteLine ("open " & strFTPServerName)
objMyFile.WriteLine (strLoginID)
objMyFile.WriteLine (strPassword)
objMyFile.WriteLine ("cd " & strFTPServerFolder)
objMyFile.WriteLine ("ascii")
objMyFile.WriteLine ("lcd " & strLocalFolderName)
objMyFile.WriteLine ("get " & FileLog)
objMyFile.WriteLine ("delete " & FileLog & " > c:\output.txt")
objMyFile.WriteLine ("bye")
objMyFile.Close
Set objMyFile = Nothing
```

```
Set objShell = WScript.CreateObject( "WScript.Shell" )
Return = objShell.Run("ftp -s:" & Chr(34) & strFTPScriptFileName &
chr(34) ,1,true)
```

```
Set objFSO = Nothing
```

```
*****
```

I have modified the row with delete command, but it's don't write any files.

Re: FTP delete problem

The verbose mode is always on.
I test the output ">" to file, but nothing.

In my script I use the options -s for the file.
The options -d (debugging), how it works?

Bernard Cheah [MVP] ha scritto:

look at the ftp command, turn on verbose
mode
then redirect the output to a text file via the
'>' method

e.g. c:\>dir *.* > output.txt

How i can save the output of
FTP command?
If i am in session in the
server the scheduled script
result OK.
But in automated state
scheduled the files that i get
don't delete.

In my script i make a txt file
with a sequence of
command :
logon,lcd,get and delete, by
wscript.shell.run

In this mode i try to print the
output in the other files, but
nothing to
do.

Re: FTP delete problem

I don't know the error,
the ftp command save the
status in temp files that i
don't know?

Thanks

Strange
indeed. was
it error 550
in the status
code?
Sound like
ftp cache
issue to me,
but it works
in manual
mode :(

is it always
failed to
delete the
log?

I
have
made
a
script

Re: FTP delete problem

in
server
A
that
make
ftp
connection
to
server
B,
Get
a
file
and
Delete
it
after.
Well,
in
this
script
i
have
insert
username,password
of
local
account
of
server
B
that
have
read/write/delete
access
in
the
directory
that
i
need.
This
script
is
scheduled
every
day
(i
download
the
day

Re: FTP delete problem

before
IIS
logfile
to
another
server)
and
it
Get
without
problem,
but
don't
Delete
log
file,
strangely
if
i
run
manually
this
script,
the
Delete
problem
have
resolved.
There
is
problem
in
windows
2003
ftp
server
or
in
the
credentials
of
script
scheduled?
Please
Help
Me.
