We have an IIS site running under windows 2003 server. People who have "upgraded" to IE7 are now upset that they get "To view this FTP site in Windows Explorer, click Page, and then click Open FTP Site in Windows Explorer" when they go to our ftp site. Is there something we can change in IIS to correct this so we don't piss off our clients?

Thanks

.

"To view this FTP site in Windows Explorer, click Page, and then click Open FTP Site in Windows Explorer"
