- 

Hello all,

I am trying to setup FTP for the very first time and my server sits behind a Linksys router & i'm DHCP.

Can someone walk me through the steps get going on this. I have a W2K Advance Server.

This is my very first attempt and I'm hoping someone can outline the 'straight to the point' steps to get me there.

I'm hoping to challenge someone who's an expert to achieve success with getting me completed.

THANKS ALL!
