Ok 530 – are you using any user isolation feature?  
the user has permissions to the ftp folder?

if you using user isolation, ensure you have setup as per required folder structure. you can get filemon to trace as well, it will shows you where does IIS ftp sending the user to and was there any permissions related issue.

Hello Bernard

Sorry for the delay.

What's the error msgs? can you post the output of ftp.exe when connection  
as  
the administrator?

Here ist waht you're looking for:

```
C:\>ftp acsv3k03.acutronic.ch
Verbindung mit acsv3k03.acutronic.ch wurde hergestellt.
220-Microsoft FTP Service
*****
* *
* Willkommen auf den FTP-Server von Acutronic! *
```

Re: Windowss 2003 ftp, administrator not able to login

```
* acsv3k03.acutronic.ch *
* Das Timeout betraegt 120 Sekunden *
220 *****
Benutzer (acsv3k03.acutronic.ch:(none)): administrator
331 Password required for administrator.
Kennwort:
530 User administrator cannot log in, home directory inaccessible.
Anmeldung fehlgeschlagen.
ftp>
```

Any ideas are welcome.

Hello  
I have two servers: 1x Windows 2000 Server Standard and  
1x Windows 2003  
Standard. Both I have the same configuration. The ftp  
directory points  
the a share on a Network Appliance box. I have also  
different mounted  
network drive which works perfect (means I have no  
permission problem).  
If I connect to the Windows 2000 ftp server I get all the  
directories  
from the box (all users and also the user administrator) but if  
I  
connect to the Windows 2003 ftp server all users can connect  
to box'  
share but not the user administrator (or all user which are in  
the  
group administrators). What I'm doing wrong? GPOs?
