Single point of control versus two would be my main benefit of using one SMTP server. But if you have connectivity issues you may choose otherwise.

>2.How do i connect to SMTP server, is there any COM\MAPI\NET api?

The CDO object is what you're looking for.

http://msdn.microsoft.com/library/default.asp?url=/library/en-us/cdo/html/olemsg_overview_of_cdo.asp

>3.Can i connect to SMTP server from a different machine?

Yep.

>4.Can i subscribe to events of SMTP server from a different machine?

I don't understand the question.

microsoft.public.inetserver.iis.smtp_nntp: Re: How do i use SMTP server from my application?

>5.does SMTP server support WEBDAV?

SMTP supports SMTP (conveniently). WebDAV is a different technology, but you could write code to send files uploaded via WebDAV for example.
