I am having some problems getting URLScan 2.5 running properly on IIS6. I can't get the default doc to display unless it is written out in the url. If I remove urlscan from the server it is okay. The urlscan logs looks like it is seeing a . in the url and rejecting the request there is obviously no period in the url

Help please

Mike

<http://ricweb3/default.asp> output: Boo

<http://ricweb3/> output: The system cannot find the file specified.

```
code in default.asp
<%
response.write "Boo"
%>
```

---

>*From urlscanlog:*

```
[06-04-2004 - 09:08:20] Client at xxx.xxx.xxx.xxx: URL
contains extension '.', which is not specifically allowed.
Request will be rejected. Site Instance='599050834', Raw
URL='/'
```

---

urlscan.ini settings  
UseAllowExtensions=1

```
[AllowExtensions]
;
; Extensions listed here are commonly used on a typical
IIS server.
;
```

microsoft.public.inetserver.iis: URLSCAN on IIS6 config

; Note that these entries are effective  
if "UseAllowExtensions=1"  
; is set in the [Options] section above.
