I write a basic test page "test.asp" as below;

```
<!DOCTYPE HTML PUBLIC "-//W3C//DTD HTML 4.0 Transitional//EN">
<html>
<head>
<title>Test</title>
<meta name=vs_defaultClientScript content="JavaScript">
<meta name=vs_targetSchema content="http://schemas.microsoft.com/intellisense/ie3-2nav3-0">
<meta name="GENERATOR" content="Microsoft Visual Studio.NET 7.0">
<meta name=ProgId content=VisualStudio.HTML>
<meta name=Originator content="Microsoft Visual Studio.NET 7.0">
</head>

<body MS_POSITIONING="FlowLayout">
<%
    Response.Write("Session ID = " &Session.SessionID)
%>
</body>
</html>
```

When browse this page by IE6.0, whenever refresh this page, i see another session ID.

I run IIS6.0 in "IIS 5.0 isolation mode". Can someone help me ? Why my session variables lost every refresh or page changed in same application ?

Thanks for helps...
