Hello,

Make sure all the permissions and user right are correct as per following KB article:

812614 Default permissions and user rights for IIS 6.0

<http://support.microsoft.com/?id=812614>

You could use AuthDiag tool to troubleshoot this issue.

<http://www.microsoft.com/downloads/details.aspx?FamilyID=e90fe777-4a21-4066-bd22-b931f7572e9a&DisplayLa>

This tool will help to findout the source of authentication and authorization failures.

HTH.

Thanks!

Ganesh Anekar
