Sorry, I didn't realise you had snippets from different logilfes...

Cheers

Ken

: Thanks Ken, I do _not_ believe that DLL is okay. It was written as a
freeware

: component by a company that is no longer in operation. I was about to
begin

: replacing it, but then the third hang shows the same error box in a
: completely different component. The error messages were similar enough
that I

: wonder if there wasn't some other issue causing these objects to throw a
: message box. Seems strange!

:

: Thanks for your insights.
