WenJun,

Thank you for the reply. I checked the security and the accounts have permission.

I am now trying to search only one directory on the local machine as before in the dir is one .txt file and several graphic files. I have checked Index Files with unknown extension. and want to search the filenames by using all or part of the filename. I still cannot get any return results.

Thank you,

--

Jerry

Hi Jerry,

Please further check the permission of the problematic catalog's catalog.wci directory(hidden). For test purpose, you may temporarily grant Everyone group with Read permission on it and restart indexing service.

Also you can properly query the catalog with the query form of indexing service mmc, right? Have you tried deploying the ASP.net application on the server locally to test? Another possible cause is the ASP.net identity (Networking Service or ASPNET) doesn't have permission on the indexed files. Indexing Service will check ACL to determine if the user has right on the indexed content. If not, it doesn't return the results.

Please update any findings or test result here for us to move on.

Have a nice day.

Sincerely,

WenJun Zhang

Microsoft Online Community Support

=====

Get notification to my posts through email? Please refer to:
<http://msdn.microsoft.com/subscriptions/managednewsgroups/default.aspx#notifications>.

Note: The MSDN Managed Newsgroup support offering is for non-urgent issues where an initial response from the community or a Microsoft Support Engineer within 1 business day is acceptable. Please note that each follow up response may take approximately 2 business days as the support professional working with you may need further investigation to reach the most efficient resolution. The offering is not appropriate for situations that require urgent, real-time or phone-based interactions or complex project analysis and dump analysis issues. Issues of this nature are best handled working with a dedicated Microsoft Support Engineer by contacting Microsoft Customer Support Services (CSS) at:

<http://msdn.microsoft.com/subscriptions/support/default.aspx>.
