Hello. I recently purchased a new laptop that is running Windows XP SP2 Professional with Internet Explore 6.0 SP2. My question is: How do I make Yahoo Mail my default email program? I know I need to go to Tools>internet option>programs tab and then from the E-mail drop down menu I select it...but I do not see Yahoo Mail as an option. I recall that I was able to do that on my previous laptop that was running Win2K Professional with IE 5.0. Also, on my old laptop I had Yahoo Messenger and on my new laptop I do not have Yahoo Messenger installed. So maybe thats why its not an option. Any advice/suggestions would be greatly appreciated. Thank you. Rochelle.
